7 MACRO-ECONOMIC COMMENTARY**Inflation**

Overall annual inflation in December 2025 remained unchanged at **4.5%**, compared to the November 2025 overall inflation, mainly driven by higher non-core inflation,.i.e, food and energy prices. The inflation remains within the target range of **5% \pm 2.5%**.

Kenya Shilling

In December 2025 the Kenya Shilling marginally depreciated to the dollar by 65 basis points to **Kes. 129.01**, compared to **Kes.129.82** from the previous month. The FX reserves stood at USD 12.168 million (equivalent to 5.3 months of import cover).

Interest Rates

Interest rates of short term instruments continues to decline reflected in the Treasury Bills space with the 91, 182 and 364 day paper closing the month at **7.73%, 7.80%** and **9.21%** from **7.83%, 7.80%** and **9.38%** respectively.

Bond Markets

The total bonds turnover closed the month at Kes. 230.43 billion an increment of 19.16% from Kes. 193.83 billion recorded in November 2025. This indicates increased activities in the secondary market.

Recommendation

The fund will continue to invest in government bonds with attractive interest rates and realize capital gains on bonds when opportunity arises. We continue to scout for attractive yields for call and fixed deposits to be held in the fund and opportunities in other fixed income assets such as corporate bonds.
